Market Update: Buy FXP, EEV, BZQ

Dear Subscribers,

While the markets have begun to drop again, the US indexes are generally holding up. The emerging markets however are taking a dive and ready for a serious collapse.

Let's take advantage of this to open our short Emerging markets positions

Action to Take: Buy the UltraShort China ETF (FXP).

Action to Take: Buy the UltraShort Emerging Markets ETF (EEV).

Action to Take: Buy the UltraShort Brazil ETF (BZQ).

I'll send out an update as soon as it's time to buy our US-focused UltraShort ETFs.

Good Investing!

Graham Summers
