

PRIVATE WEALTH ADVISORY

AN OMNISANS RESEARCH PUBLICATION

MARCH 5, 2010

Sell TWM, QID, BZQ

Dear Subscribers

The market is exploding higher based on fudged economic data. Real unemployment has risen 0.3 to a near record 16.8%.

Regardless, it's clear we're going into a blow-off top. My gut feeling is that the banks are going to push this thing into options expiration week which is a week or so from now. I expect we'll see the S&P 500 top out at 1,1155 or so.

With that in mind, we're selling several of our positions NOW.

Action to take: Sell the Ultrashort Russell 2000 (TWM)

Action to take: Sell the Ultrashort Nasdaq (QID)

Action to take: Sell the UltraShort Brazil ETF (BZQ)

Let's take a look at the market early next week from a clean slate.

Good Investing!
